NPL-MANAGEMENT FORUM

The active development of Indonesia's economy in recent years has given impetus to the growth of the consumer market, which led to a high growth rate of retail lending. In the context of credit growth, it is particularly important to control the risks and quality of credit portfolios in order to prevent a sharp increase in NPL volume, which can threaten the liquidity of the banking sector and put at risk the growth rate of the national economy.

The Forum aims to provide to all participants a full understanding of the importance of the key factors related to NPL management, to inform them about the latest trends in the collection market of Indonesia and abroad, to give the opportunity to expand their professional knowledge and experiences on the field. The Forum is also an opportunity for participants to learn the insights of the most emerging topics in NPL and credit risks management, current economy situation, to listen to case studies of foreign companies and to share best practices.
